EXPERIENCE

RE
Los Angeles / *July 2020 — Current*
Created wireframes and translated them to React and React Native code in collaboration with one other developer. Spearheaded and designed all digital artwork for web and mobile app versions.

Adobe x Netflix Creative Jam
Los Angeles / July 2020
Designed a streaming service for collaborative viewing, which incorporated watch parties, playlists, and polls. Created an animated high fidelity prototype with 30 screens in collaboration with creative partner.

Mozilla's Fix-the-Internet Hackternship
Los Angeles / *Feb — May 2020*
Collaborated with two others to develop original app solution, to address misinformation online. Collected user research, designed wireframes, created personas, ran user tests, designed visuals, and coded news-centered React web platform.

EXPERIENCE CONTINUED

JAG Mobile App
Los Angeles / *Nov — Dec 2019*
Cultivated new app idea to help college students form social and academic connections in response to anxiety. Created wireframes, user journey maps, information architecture, style guide, and storyboard. Conducted user interviews and tests throughout design process.

Package Tracker Web App
Los Angeles / *Oct — Nov 2019*
Wireframed, developed, and tested single-page React package tracker web app in order to satisfy Nielson's five usability metrics. Researched usability guidelines, utilized two APIs, and designed all app artwork.

Summer Opportunities for Advanced Research (SOAR)
Los Angeles / *May — July 2019*
Developed accessible website with over 30 pages in WordPress for the D.K. Kim Foundation. Reorganized, modernized, and enhanced site content, navigation, and engagement. Researched current accessibility and usability challenges of modern web platforms, and presented a range of solutions.
